

Environmental Policy

Livingstone is committed to developing solutions to overall environmental aspects and impacts related to our operational and construction activities. We will continue to advance our environmental management systems and efficiently plan our activities to sustain our natural environment for future generations.

The success of this Environmental Policy will only be achieved by the active participation of all workers.

Livingstone will achieve the purpose and aim of our policy by:

- Complying with all relevant legal and statutory legislation, regulations, codes of practice, standards, and guidelines in relation to the environment affecting the building industry.
- Continually improving our environmental performance by providing the resources to set objectives and carrying out regular site audits.
- Protecting the natural environment and preventing pollution by developing policies and procedures which all employees, contractors and visitors will be required to adhere to.
- Encouraging and supporting waste minimisation, the diversion of waste from landfill wherever possible and disposing of waste in a responsible manner.
- Researching the composition, manufacture, and source of materials and to use those which are environmentally friendly and sustainable.
- Encouraging our subcontractors and suppliers to improve their environmental awareness and performance.
- Aligning all company policies and procedures to promote environmentally sustainable processes.
- Encouraging all Livingstone staff and on-site subcontractors to continuously improve our environmental sustainability performance to minimise our footprint and improve our use of natural resources.

Livingstone will ensure that every employee is made aware of this policy, and it shall be displayed in all Livingstone workplaces.
